beep&park/vision™

# beep&park/vision

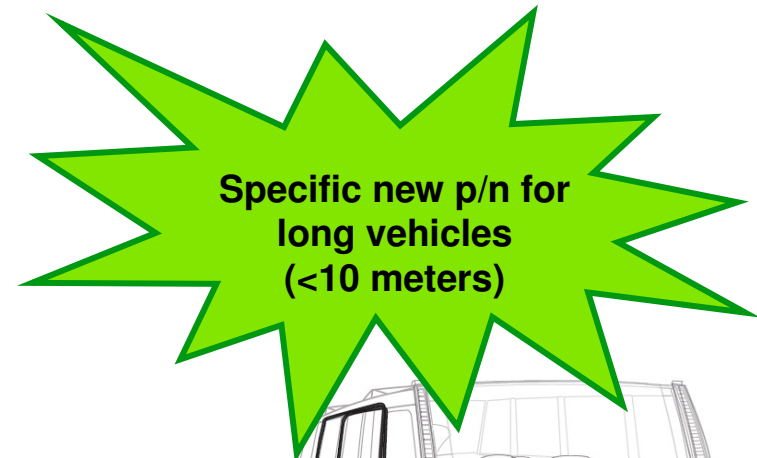

## Park at a glance !

- **beep&park/vision** is a rear parking system with sensors, coupled with a rear-view camera to provide drivers with audible and visual information when reversing.

### ■ Safety & Comfort :

- ➔ Reduces risks of collision and associated high repair costs.
- ➔ Limits the risk of accidents with pedestrians when reversing or leaving a parking space.
- ➔ Offers a double visual and audible control, for the area immediately behind the vehicle.
- ➔ Greater peace of mind.
- ➔ Quicker and easier parking manoeuvres.
- ➔ No need to turn head when parking.
